INTRODUCTION

The 1985-86 *ARL Statistics* presents data from the 118 U.S. and Canadian research libraries that were members of the Association of Research Libraries during the 1985-86 fiscal year. The ARL membership consists of 106 university libraries and 12 public or private, independent research libraries.

Expenditures for ARL university libraries topped the $1 billion mark this year, an 8.4% increase over 1984-85 expenditures, while expenditures for the membership as a whole were over $1.4 billion, a 6.58% increase over last year. For university libraries, approximately 32% of expenditures were for library materials (with current serials taking up about half of that amount), 1% for binding, 53% for salaries and wages, and 13% for other operating expenditures, a catch-all category for nonmaterials and nonsalary expenditures (e.g., automation expenditures). Median figures for ARL university library members showed that expenditures for library materials rose by 7.8% this year, with expenditures for serials increasing by 7.44% over 1984-85; salary and wage figures rose by 5.95%, while the number of total staff increased about 1.94%; other operating expenditures in university libraries rose 17.45%; and finally, total operating figures for this group were 11.65% higher than last year.

A number of substantive changes have been made to the *ARL Statistics* this year.

- Two new elements were added: **Number of Monographic Volumes Purchased** and, for university libraries, **Number of Full-time Instructional Faculty** at the parent institution. (Both of these questions had been tested during the previous two years in supplementary statistics surveys.)

- **Expenditures** were disaggregated in an attempt to collect more comparable data. Libraries were asked to report figures for materials expenditures in four individual categories: monographs, current serials, other (e.g. audiovisual materials, microforms, etc.), and miscellaneous (non-materials expenditures made from the materials budget, e.g. bibliographic utilities). Salary and wage figures were to be disaggregated into professional, nonprofessional, and student assistants.

- **Current Serials** were disaggregated into **Current Serials Purchased** and **Current Serials Not Purchased.**

- **Interlibrary Loan** figures have been aggregated; only totals for items borrowed and items loaned were reported, instead of originals and photocopies in each category, as in previous years.

As is the case when any changes are introduced, a number of libraries were not able to supply the data for the new elements or for the disaggregated categories. It is anticipated that in future years additional libraries will supply these data.

In addition to adding new and more precise data elements, the Committee on ARL Statistics has been working to clarify definitions and instructions which have been subject to misinterpretation,[1] and encouraging member libraries to bring their reporting into full compliance with the ARL definitions. Also, new procedures have been adopted to check the data submitted by member libraries for accuracy and consistency and to explain anomalies.

Because of the new data elements and the adjustments a number of libraries have made in their reporting procedures to be more consistent with the ARL definitions, caution should be used in comparing this year's data to previous year's, especially data on collections. For example, a number of libraries discovered that their treatment of government documents was not consistent with ARL's definitions and have adjusted their figures for volumes held, current serials, and microform holdings accordingly. In some cases, this has resulted in changes of relative position in the rank order tables.

Those using the *ARL Statistics* to compare individual institutions will need to consult the symbols indicated on the "ARL Library Data Tables" and the "Footnotes." Although the definitions and procedures used in the *Statistics* questionnaire are aimed at achieving consistency, as noted above, variant reporting practices do exist among ARL libraries. To aid comparability, expenditures of Canadian libraries are expressed in U.S. dollars in the *ARL Statistics*; the exchange rate used for 1985-86 is 1.3817 Canadian dollars to one U.S. dollar.[2]

The rank order tables presented in this publication are not intended to imply qualitative evaluations of the institutions described. In comparing any individual library to ARL medians or to other ARL members, one must always make evaluations within the context of local goals and characteristics.

Notes

1. The survey form and instructions, including definitions, for the 1985-86 *ARL Statistics* are reprinted on pages 55-62.

2. The rate used is the average monthly noon exchange rate published in the Bank of Canada *Review* for the period July 1985-June 1986. Expenditures as reported in Canadian dollars are given in the "Footnotes" to the *ARL Statistics*.

ANALYSIS OF SELECTED VARIABLES OF UNIVERSITY LIBRARIES

The percentages and ratios below are intended to summarize the basic data in the ARL Library Data Tables. The high, median, and low figures indicate the range as well as the midpoint for ARL's 106 university library members.

Category	High	Median	Low
1. Professional Staff as percent of Total Staff	44	25	16
2. Nonprofessional Staff as percent of Total Staff	72	51	15
3. Student Assistant Staff as percent of Total Staff	56	23	2
4. Ratio of Professional Staff to Non-professional Staff (excluding student assistants)	2.0:1	0.5:1	0.3:1
5. Ratio of Items Loaned to Items Borrowed	19.4:1	2.2:1	0.6:1
6. Serials Expenditures as percent of Materials Expenditures	72	52	32
7. Materials Expenditures as percent of Total Operating Expenditures	50	34	22
8. Contract Binding as percent of Total Operating Expenditures	3.1	1.8	0.8
9. Salary and Wage Expenditures as percent of Total Operating Expenditures	68	52	40
10. Other Operating Expenditures as percent of Total Operating Expenditures	27	12	1
11. Unit cost of monographs (per volume)	59.37	29.50	12.19
12. Unit cost of serials (per title)	140.08	87.47	42.48

Median figures are useful indicators when there is wide dispersion within a distribution. Because the mean represents a "balance point," a few very high or low scores may sometimes pull the mean away from the actual point at which values cluster. Medians, on the other hand, are a measure of central tendency, focusing on the midpoint in a distribution, and are thus preferable for describing ARL libraries.

SUMMARY OF RANK ORDER TABLES FOR UNIVERSITY LIBRARIES

The table below presents the rank for each university library in each of the seventeen categories for which rank order tables are prepared. As a further indication of the relative position of each institution, note that, in the individual rank order tables on the following pages, "group codes" are used. This is done because, in a number of cases, there is a relatively insignificant difference between two institutions which are nevertheless given two different rankings. The "coarser" ranking provided by clustering institutions into groups (based upon ranges) more realistically describes a library's relative standing.

The table numbers in the chart below refer to the following categories:

RANK ORDER TABLES OF UNIVERSITY LIBRARIES

RANK ORDER TABLE 1: VOLUMES IN LIBRARY

The grouping of institutions below is done because, in a number of cases, there is a relatively insignificant difference between two institutions, which are nevertheless given two different rankings. In order to provide a "coarser" ranking, the institutions are thus clustered into groups according to the ranges specified here.

Group Ranges (in thousands) are:

1- 9,000 and over
2- 8,000-8,999
3- 7,000-7,999
4- 6,000-6,999
5- 5,000-5,999
6- 4,000-4,999
7- 3,000-3,999
8- 2,000-2,999
9- 1,000-1,999

RANK ORDER TABLE 3: CURRENT SERIALS (TOTAL)

The grouping of institutions below is done because, in a number of cases, there is a relatively insignificant difference between two institutions, which are nevertheless given two different rankings. In order to provide a "coarser" ranking, the institutions are thus clustered into groups according to the ranges specified here.

The ranges for the groups below are:

1- 90,000 and over
2- 80,000-89,999
3- 70,000-79,999
4- 60,000-69,999

RANK ORDER TABLE 6: SALARIES AND WAGES

The grouping of institutions below is done because, in a number of cases, there is a relatively insignificant difference between two institutions, which are nevertheless given two different rankings. In order to provide a "coarser" ranking, the institutions are thus clustered into groups according to the ranges specified here.

Group Ranges (in thousands) are:

RANK ORDER TABLE 14: TOTAL ITEMS BORROWED

The grouping of institutions below is done because, in a number of cases, there is a relatively insignificant difference between two institutions, which are nevertheless given two different rankings. In order to provide a "coarser" ranking, the institutions are thus clustered into groups according to the ranges specified here.

The ranges for the groups below are:

1- 18,000 and over
2- 16,000-17,999
3- 14,000-15,999

ARL STATISTICS 1985-86

Instructions for Completion of the Questionnaire

1. Definitions of the statistical categories used in this questionnaire can be found in American National Standard for Library and Information Sciences and Related Publishing Practices - Library Statistics. Z39.7-1983. (New York, American National Standards Institute, 1983.)

2. The questionnaire assumes a fiscal year ending June 30, 1986. If your fiscal year is different, please provide a footnote on p. 4 of the questionnaire.

3. All figures should be rounded to the nearest whole number, except for Hours in work week (p. 3 of questionnaire).

4. If the appropriate answer is "0" or none, use "0." If an exact figure is unavailable, use "U/A." If a question is not applicable, use "N/A."

5. In a university which includes both main and branch campuses, an effort should be made to report figures for the main campus only. (The U.S. National Center for Education Statistics in its Higher Education General Information Survey described a branch campus as one "located in a community different from that of its parent institution ... beyond a reasonable commuting distance from the main campus ... The educational activities at the location must be organized on a relatively permanent basis ... and include course offerings for one or more complete college-level programs of at least one full year.") If figures for libraries located on branch campuses are reported, please provide an explanatory footnote on p. 4 of the questionnaire.

6. A branch library is defined as an auxiliary library service outlet with quarters separate from the central library of a system, which has a basic collection of books and other materials, a regular staffing level, and an established schedule. A branch library is administered either by the central library or (as in the case of some law and medical libraries) through the administrative structure of other units within the university. Departmental study/reading rooms are not included.

7. Questions 1-5. Use the ANSI Z39.7-1983 definition for "Volume" as follows:

> A physical unit of any printed, typewritten, handwritten, mimeographed, or processed work, contained in one binding or portfolio, hardbound or paperbound, which has been cataloged, classified, and made ready for use.

Include duplicates and bound volumes of periodicals. Exclude microforms, maps, nonprint materials, and uncataloged items. Exclude government document volumes unless they are cataloged, classified, and shelved as part of the general collection. If any of these items cannnot be excluded, please provide an explanatory footnote on p. 4 of the questionnaire. For purposes of this questionnaire, unclassified bound serials that are arranged in alphabetical order are considered classified.

8. Question 2. Include only volumes cataloged, classified, and made ready for use.

9. Question 6. Report number of volumes purchased. Include all volumes for which an expenditure was made during 1985-86, including volumes paid for in advance but not received during the fiscal year. Include monographs in series and continuations. If only number of titles purchased can be reported, please report the data and provide an explanatory footnote on p. 4 of the questionnaire. Note: this question is concerned with volumes purchased rather than volumes received or cataloged. Question 15 requests the expenditure for the volumes counted here.

10. Questions 7-9. Include duplicate subscriptions and only those government document serials that are cataloged, classified, and shelved as part of the general collection; do not include government documents serials that are housed in a separate government documents collection. Exclude monographic and publishers' series. A serial is

> "a publication issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies."

11. Question 10. Include number of reels of microfilm, number of microcards, and number of microprint and microfiche sheets. Exclude government document microforms.

12. Questions 11-14 - Personnel. Report the number of staff in filled positions, or positions which are only temporarily vacant. Include cost recovery positions and staff hired for special projects and grants, but provide an explanatory footnote indicating the number of such staff. If such staff cannot be included, provide a footnote on p. 4 of the questionnaire. The number of FTE staff should be determined on the basis of the length of the work week in the reporting library. Round figures to the nearest whole numbers. Please give the number of hours in the work week on p. 4 of the questionnaire.

13. Question 11. Since the criteria for determining professional status vary among libraries, there is no attempt to define the term "professional." Each library should report those staff members it considers professional, including, when appropriate, staff who are not librarians in the strict sense of the term, such as computer experts, systems analysts, budget officers, etc.

14. Questions 15-26 - Expenditures. Report all expenditures of funds that come to the library from the regular institutional budget and from other sources, such as research grants, special projects, gifts and endowments, and fees for service.

    Canadian libraries should report expenditures in both Canadian and U.S. dollars. To determine figures in U.S. dollars, divide Canadian dollar amounts by 1.3817, the average monthly noon exchange rate published in the Bank of Canada Review for the period July 1985 - June 1986.

15. Question 15. Include here expenditures for volumes reported on line 6.

16. Question 16. Exclude monographic and publishers' series.

17. Question 17. Include all materials except monographs and current serials, e.g. microforms, backfiles of serials, charts and maps, audiovisual materials, manuscripts, electronic media, etc.

18. Question 18. Include any other materials funds expenditures not included in questions 15-17, e.g., expenditures for bibliographic utilities, literature searching, security devices, memberships for the purposes of publications, etc. Please list categories, with amounts, in a footnote on p. 4 of the questionnaire.

19. Question 20. Include only contract expenditures. If all binding is done in-house, state this fact and give in-house expenditures in a footnote on p. 4 of the questionnaire; do not include personnel expenditures.

20. Questions 21-24. Exclude fringe benefits.

21. Questions 23-24. Report 100% of student wages. Include federal and local funds for work study students, regardless of budgetary source of funds.

22. Question 25. Exclude expenditures for buildings, maintenance, and fringe benefits.

23. Questions 27-28. Include both original materials and photocopies in lieu of originals.

24. Questions 29-30 - Ph.D. Degrees. Please note that only the number of Ph.D. degrees are to be counted. Statistics on all other advanced degrees (e.g., D.Ed., D.P.A., M.D., J.D.) are not included in this survey. If you are unable to provide a figure for Ph.D.s only, please note this in a footnote on p. 4 of the questionnaire.

25. Question 30. For the purposes of this report, Ph.D. fields are defined as the specific discipline specialties formerly enumerated in the form used by the U.S. Department of Education entitled, "Higher Education General Information Survey, Degrees . . . Conferred," designated as NCES Form 2300-2.1A-1.

    Although the HEGIS form requested figures for all doctoral degrees, only fields in which Ph.D.s are awarded should be reported on the ARL questionnaire. Any exceptions should be noted in a footnote on p. 4 of the questionnaire.

26. Questions 31-34 - Enrollment. U.S. libraries should use the 1985-86 enrollment figures reported to the Department of Education on the form entitled "Higher Education General Information Survey XX, Fall Enrollment and Compliance Report . . . 1985," designated as NCES Form 2300-2.3A. The line and column numbers on the HEGIS form for each category are noted on the questionnaire. Please check these figures against the enrollment figures reported to ARL in 1985 to ensure consistency and accuracy.

27. Question 35 - Faculty. U.S. libraries should report the number of faculty for the academic year 1985-86 that were reported to the Department of Education on HEGIS form 2300-3, line 7, columns 1 plus 4, and line 14, columns 1 plus 4. This form was entitled "Salaries, Tenure, and Fringe Benefits of Full-time Instructional Faculty" for 1985-86. Instructional faculty are defined as those members of the Instructional/Research staff who are employed on a full-time basis and whose major regular assignment is instruction, including those with released time for research.

28. Reporting libraries are urged to record in the footnote section any information that would clarify the figures submitted, e.g., the inclusion of branch campus libraries.

Explanatory footnotes will be included with the published statistics. Please make an effort to word your footnotes in a manner consistent with notes appearing in the published report, so that the ARL Office can interpret your footnotes correctly. For your convenience, a copy of your footnotes from the 1984-85 ARL Statistics is included in the questionnaire. (Please note that the number in parentheses refers to the appropriate column on the Library Data Tables in the published Statistics not to a line number on the questionnaire.) 1984-85 Footnotes are not included on Law and Medical library questionnaires.

29. After the questionnaire has been completed, please compare the figures with those submitted last year. On occasion, an error will be detected because of an unusual difference between numbers submitted this year and those for the preceding year. If an unusual change has occurred, please provide an explanatory footnote on p. 4 of the questionnaire.

30. Return one copy of each questionnaire to the ARL Office by October 15, 1986. If there are any questions about the procedure to be followed in completing these questionnaires, contact the ARL Office. Please be sure the library director has signed the questionnaires before they are returned to the ARL Office.
